There's no greater freedom than finding your purpose, says education advocate Ashweetha Shetty. Born to a poor family in rural India, Shetty didn't let the social norms of her community stifle her dreams and silence her voice. In this personal talk, she shares how she found self-worth through education – and how she's working to empower other rural youth to explore their potential. "All of us are born into a reality that we blindly accept – until something awakens us and a new world opens up," Shetty says.

Her speech is so inspiring!

I would like to say that I'm experiencing the same thing. People always prefer to give the opportunity to a boy.

after this, I am taking my education 200% more seriously, not that I never took it seriously.

As a mother of two girls this story makes me cry. It was very clear for me from the first second of their life I will always support them and encourage them to do whatever they want to do. Education and knowledge is the only thing that can help make the world a better place for everyone.
